

HCC: Save Water With Predictive Watering® Adjustments

The next-generation HCC Controller brings the powerful cloud-based irrigation management capabilities of the industry-leading Hydrowise® Platform to high-end residential, commercial, and public-sector projects.

The modular HCC provides a range of convenient features to monitor larger projects with up to 54 stations — all with the simple click of a button. A full graphical touchscreen interface allows for programming and manual operation at the controller, with or without Wi-Fi connectivity. For maximum irrigation design flexibility, the controller also offers two-wire compatibility with the Hunter EZ Decoder System (EZDS).

Hunter®

The **HCC Controller** combines the robust features of the popular ICC2 Controller with the automatic weather adjustments of best-in-class Hydrawise Irrigation Management Technology to provide a smart and powerful control system for large projects.

MODELS:

Plastic Outdoor Controller

8 to 38 stations*

- 8-station base model
- Wall mount

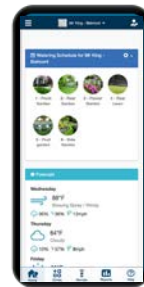

* Up to 54 stations with EZDS

Powder-Coated Metal or Stainless Steel Outdoor Controller

8 to 54 stations

- 8-station base model
- Wall or pedestal mount

All Hydrawise enabled controllers are EPA WaterSense® approved when connected to Hydrawise web-based software. Built-in Predictive Watering Technology allows the controller to automatically adjust watering schedules based on local weather conditions to maximize water savings.

Compatible with:

Station Expansion Modules

EZ Decoder System

HC Flow Meter

ROAM XL Remote

Hunter Industries is committed to manufacturing top-quality products that use only the water and energy needed to get the job done efficiently. Learn more at hunterindustries.com.
